## Course catalogue (#3: Seminars)

*Important: Mandatory bidding deadline for seminars on April 8 23:59!*

<https://seminars.cs.uni-saarland.de>

The central registration for all computer science seminars will open on September 11th.

This system is used to distribute students among the available seminars offered by the CS department. To register for any of the seminars, you have to register here until October 16th, 23:59 CET. You can select which seminar you would like to take, and will then be automatically assigned to one of them on October 18th.

## Preparing for your thesis

- Choose your courses strategically
  - Check out the research that the group does – is that interesting? If so, figure out if they have a lecture/seminar/etc
- Approach (or better: impress) potential supervisors
  - Best case: focus on doing really well in the lecture/seminar of your potential supervisor
- Attend the right Master seminar
  - Idea: see how other people are doing their research (hint: check out the CISPA CMS for details on the seminar even before you start your thesis; you can always attend it even without having a topic)
- Agree on a subject, timeline, and register your thesis
  - My personal approach: develop a thesis proposal to cover the goals **before** registering the thesis
- Find a second advisor
  - All Master theses require two examiners; discuss with your primary advisor early on who takes care of finding the second person
- Consult the student council FAQ for theses: <https://cs.fs.uni-saarland.de/en/faq/thesis/>
